

#### Pseudocode – Number of stamps

- Obtain number of sheets of paper from User or Input Device;
- Save as **sheetAmount**;
- Identify if **sheetAmount** is smaller or equal to 15;
- If **sheetAmount** is more than 15 the package should not be sent – determine as No-go and display to the user that the letter should not be sent;
- If **sheetAmount** is less/equal to 15 – determine the amount of stamps needed;
- Take **sheetAmount** and divide by 5;
- Save as **stampAmount**;
- **stampAmount** should be rounded up; and
- Display **stampAmount** to the user as an integer.
